

Autosampler

Automated Drill Cuttings Sampling

Real-time information on ore grade and location

SYSTEM FEATURES Autosampler

- Automated sampling of grade control and production drill holes
- For dry and wet samples
- Remote controlled by drill operator
- Optional integrated sample splitter
- Ability to bypass unwanted material
- Easy and fast installation to drills
- Designed and manufactured by Sofimine Ltd.

BENEFITS

- No need for sample changer
- Sample represents the whole drill hole
- Less human sampling error
- Also available with SoftCore™ sampling method

SoftCore™ sample “sock” preserves ore natural layering for detailed analysis of ore grade and position
