

Blast hole Sampler - Analyzer

Integrated Sampling and Analysis

Real-time information on ore grade and location

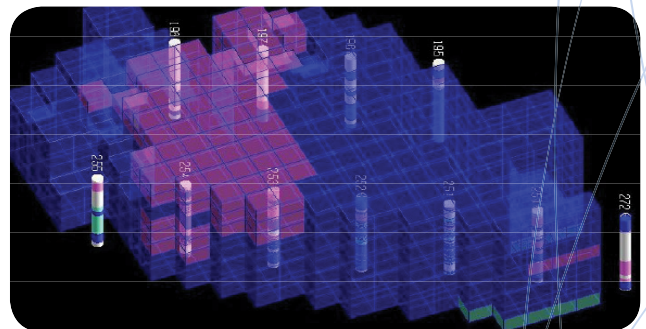

SYSTEM FEATURES

- Continuous sampling and analysis
- Immediate information on ore grade and location
- Available for all drill types
- Can be retro-fitted to existing drills
- Utilizes IMA on-line analyzers
- Samples both dry and wet drill cuttings
- Wireless data transfer

BENEFITS

- Large sampling volume to minimize sampling errors
- Accurate analysis as a function of hole depth
- Enables selective mining
- Less ore loss and dilution
- Increased mill head grade
- More mill throughput
- Better ore recovery
