

Cross - Belt Analyzer

On-line Elemental Analysis

Mine On-Line Service
www.mineonlineservice.com

Real-time information on ore grade and location

SYSTEM FEATURES

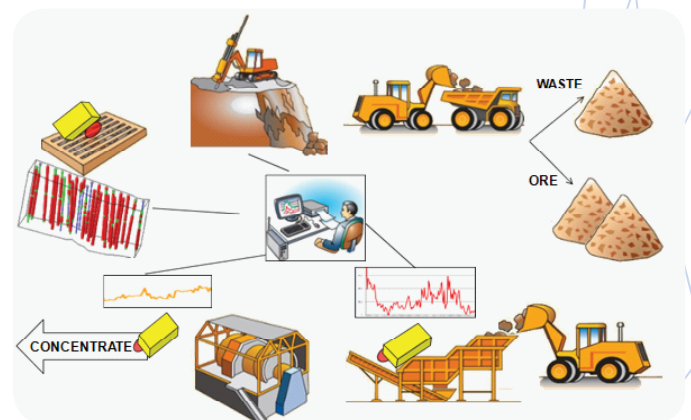

Cross belt analyzers

- Continuous measurement of ore grade and/or amount of waste rock
- Can handle material bed and ore size variations
- Enables short analysis intervals for feed variability control
- Available with IMA X-ray (XRF) or laser (LIF) analysis technology
- Easy and fast field testing available with the mobile on-line analyzer

BENEFITS

- Mining quality control
- Know your mill head grade in advance
- Feed homogenization
- Mine-Mill reconciliation
- Detection of waste rock dilution and penalty elements
- Know your real mill recovery
