New age of exploration

Mine On-Line Service
www.mineonlineservice.com

Real-time information on ore grade and location

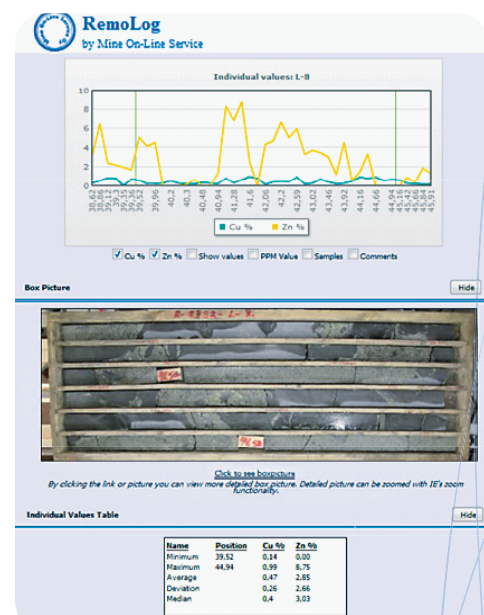

SCANMOBILE fast results

- Geochemical analysis by mobile laboratory
- Non-destructive drill core XRF-analysis
- No sample shipping, handling and preparation
- Analysis also for till, rock and drill cuttings samples
- Digital core box photo and close-up images for mineral recognition

REMOLOG instant access to data

- Analysis data and digital core photos available before logging
- Enables reactive exploration drilling planning
- Possibility to log via internet with the Remolog - remote logging tool
